Summary — Proficient Full Stack Developer skilled in building responsive web applications using HTML, CSS, JavaScript,React, and MERN stack .

Skills

HTML, CSS, JavaScript, React, MERN stack   Git, GitHub, Visual Studio Code

Experience

Kodu - Powered By Dhurina — Intern   **January 2025 - April 2025**

- Collaborated in designing and developing responsive user interfaces using HTML, CSS, and JavaScript.
- Worked on optimizing website performance and ensuring cross-browser compatibility
- Assisted in integrating APIs and dynamic content using modern JavaScript frameworks (e.g., React).
- Gained experience with version control (Git) and deployed projects using platforms like Netlify and GitHub Pages.

Education

**UEM University. Bachelor of
Computer Applications**

Certifications

- Diploma - Completed a 1-year Diploma in Computer Applications, gaining foundational knowledge in software
- Certification - Full Stack Developer Certification from Kodu Coding, specializing in modern web development technologies and practices

Projects

Image Search Application

- Developed a dynamic web application to fetch and display high-quality images from the Unsplash API
- Implemented features such as search functionality, pagination, and responsive design for an enhanced user experience
- Utilized React for the frontend, integrated Axios for API calls, and managed state effectively for seamless performance

Recipe Application

- Designed and developed a responsive web application to browse, search, and filter recipes based on ingredients or cuisine .
- Integrated APIs to fetch real-time recipe data, including preparation steps, ingredients, and nutritional information .
- Built with React for an interactive frontend and implemented state management for smooth user interactions .

Weather Application

- Built a responsive weather app that provides real-time weather data, including temperature, humidity, and forecasts, using OpenWeather API.
- Integrated search functionality to fetch weather details for any location worldwide .
- Developed using React with dynamic UI updates and optimized API calls for performance .

To-Do List Application

- Created a user-friendly to-do list app for task management, including features like adding, editing, and deleting tasks.
- Implemented persistent data storage using local storage to save tasks across sessions .
- Built with HTML, CSS, and JavaScript for a clean, responsive, and interactive user interface
